DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it is longer than 150 words and is on more than one page. Correction is required. See MPEP § 608.01(b).

Allowable Subject Matter

2. Claims 1-21 are allowed.
3. The following is an examiner's statement of reasons for allowance: the claims address a method and apparatus for obtaining images of the distribution of an internal property of an object where rays pass through the object and are detected and either intensity values put in arrays of numbers having periodic modulation in amplitude and frequency, processed and corrected for non-uniform density, and processed using a Fourier transform (as in independent claims 1, 7, and 13) or F (frequency)-components calculated and stored in an F-space array, adjusted and processed with an inverse Fourier transform (independent claim 19). These features are neither shown nor fairly suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jupiter *et al.* US 2003/0161526 A1 shows modulated data in imaging.
5. This application is in condition for allowance except for the following formal matters:

The abstract is too long.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
